

Peer Learning: How to deal with international spillover effects

Place:	Hybrid Event Online and at GIZ Representation Berlin (Reichpietschufer 20, 10785 Berlin)
Date:	12.06.2024
Time:	10am - 1pm (GMT+1)
Objective	<p>The peer-learning format aims at bringing together stakeholders from academia, civil society, the private sector and politics to discuss how countries can successfully reduce negative spillover effects. It aims to facilitate exchange among diverse actors from the Global South and Global North on the significance, assessment, and measurement of negative spillover effects to lay the foundation for mutual learning.</p> <p><u>Afternoon session (2pm - 5pm), only for present participants:</u> There will be an afternoon session for all participants present in Berlin. In this second session, the event will create space for political decision-makers from the Global North to discuss policy measures and new strategies to curb negative spillover effects.</p>
